

BACK THEN...

MORE THAN 18 YEARS AGO IT ALL BEGAN FROM THIS...

THE BEGINNING

In 2005 one of the co-founders of BaltLED visits his friend a professor at Vilnius University. The professor at the moment happens to be working on the LED-based illumination for greenhouses to enhance the vegetation of plants. The conversation turns towards new developments in LED technology. Here and now the idea to adopt LED technology for signage illumination appears. In less than a year, BaltLED is found and produces the country's first LED module for illuminated signs.

AND NOW...

WHO WE ARE TODAY
